

Licenses:

For special provisions concerning work in disaster areas, [click here](#).

Licenses are not required for employees if they are properly trained and the employer is exempt from the permit requirements. Otherwise, asbestos workers, contractors and supervisors must obtain licenses for all asbestos projects. Asbestos inspectors and project designers must obtain licenses for asbestos projects in school, public, or commercial buildings. Asbestos management planners must obtain licenses for projects in school buildings.

The application shall be on an original form provided by the Division of Labor. Photocopies are not acceptable.

The license applicant shall submit a copy of the training certificate from a trainer approved by the U.S. Environmental Protection Agency. The training certificate shall state the name of the course successfully completed, the name of the training provider, and the dates of the training. To find approved training providers, [click here](#).
